Introduction and Purpose

The purpose of the Community Assessment is to determine the socio-economic characteristics of residents in the 13 county SCHRA service area, evaluate the quality of service provided by SCHRA, and to make recommendations for service improvements. This process is meant to assist with the identification of community needs in order to tailor appropriate services and connect residents to local resources.

The Community Assessment does this by answering the question: —Where are we as a community?

The Community Assessment analyzes existing conditions and trends in the area and identifies the preliminary issues and opportunities to be considered in developing the services plan for South Central Human Resource Agency. The Community Assessment includes information on existing conditions and trends in the areas of population, housing, economic development, transportation, community facilities and services, cultural resources, land use and intergovernmental coordination. The document also includes an assessment of the agency's ability to meet the needs of the community.

The 2015 assessment provides in-depth information and analyses that focuses on the strengths, needs, and resources of families in South Central Tennessee. This assessment was accomplished by gathering qualitative and quantitative data aimed at:

- Preparing an inventory of the SCHRA community's strengths and available resources for eligible children and families on a neighborhood basis.
- Gauging the needs of service eligible children and their families.
- Enhancing the understanding of the gaps between existing community services and the needs of eligible children and families.
- Increasing the understanding of cultural demographics and diverse groups within the communities that are eligible for services.
- Identifying current and initiating new community partnerships beneficial for families and children served by SCHRA.
- Ascertaining community knowledge regarding the agency's mission and programs.
- Establishing a baseline on the current status of Head Start / Early Head Start eligible children, families, and services.

Methodology

The information gathered in this report was generated from the most recent data available. Much was obtained from the U.S. Census Bureau, the Annie E. Casey Foundation Kids Count / Tennessee Kids Count Data Center, NOLO Consulting, local community and State governmental agencies, program data and outcomes, document research on the Internet, and information collected from the recent SCHRA Community Survey. Data collected for this assessment will be submitted to the Policy Council for review and recommendations. The data collection process involved agency and program staff, families, community surveys, as well as internet research.

Overview of South Central Human Resource Agency

The South Central Human Resource Agency (SCHRA) was created in 1973 and chartered as a public not-for-profit agency February 19th, 1975. Its goal is to promote the development of human resources in South Central Tennessee through effective and efficient delivery of human services. The Agency provides services in an area that spans thirteen counties and approximately 6,500 square miles in South Central Tennessee. During the 2013-2014 program years, SCHRA channeled \$18,997,533.00 dollars into its service area through grant/contract programs and employed 346 people.

For its 38 year history, SCHRA has partnered with the communities in which it serves. SCHRA Head Start has successfully served this thirteen county area of Tennessee since 1973. Head Start in Tennessee is part of a national system of early childhood development programs serving the lower income families of our communities. Head Start is not to be confused with day care. It is an educational and nurturing program which also addresses the emotional and physical needs of each child enrolled. Head Start recognizes that parents are the child's first and most important teachers. Therefore, parents are important partners involved in the activities of each Head Start center, and training programs for adults are included in the services. Ten percent of Head Start's enrollment is reserved for children with disabilities. Medical, dental, nutritional and mental health services, as well as interpreter/translation services for families and children in the program are also provided. The program goals and objectives of SCHRA Head Start focus on and support children, families, communities, and staff. Our Head Start/Early Head Start team has expertise in: early childhood education, health, disabilities, family support and services, finance/budgeting, and management. Supplementing the full-time staff are the services of a registered Dietician, licensed Psychologist and Regional Office of Head Start Grantee Specialists with expertise in Fiscal, Program Design, Early Childhood Education, and Family Services.

Geography

Tennessee & SCHRA Service Area

	Land area in square miles	Persons per square mile
Bedford	473.64	95.1
Coffee	428.96	123.1
Franklin	554.54	74
Giles	610.93	48.3
Hickman	612.5	40.3
Lawrence	617.13	67.8
Lewis	282.09	43.1
Lincoln	570.34	58.5
Marshall	375.46	81.5
Maury	613.14	132
Moore	129.22	49.2
Perry	414.73	19.1
Wayne	734.1	23.2
SCHRA Service Area	6,417	65.77
Tennessee	41,234	153.9

<http://quickfacts.census.gov>

Considering that Tennessee, as a state, reports 153.9 persons per square mile, the SCHRA service area is quite a bit less with an average of 65.77 persons per square mile. This data confirms that the SCHRA service area is predominately rural. The largest concentration of inhabitants is in Maury County with 132 persons per square mile. Though Maury County is the second largest per land area, behind Lawrence with 617.13 square miles, the largest town (Columbia) is located in Maury County. The second largest in population density is Bedford County with 95.1 persons per square mile.

Population and Gender Data

Though Lawrence County has the largest square mile area, Maury County is the most populated in all age ranges. Coffee County is home to 3,457 children ages birth to five. Lawrence County's population of birth to five is third highest at 2,800 children. The senior population over age 64 is largest in Maury County at 10,216 and Coffee County has the second highest population at 8,056 people.

In the category of children ages 5 to 17, again, Maury County is highest with 13,836. Of note in this category is that Bedford County is a close third, ranking with 8,692 children. Additionally, Bedford ranks third in the working population between the ages of 18 and 64, with Coffee ranking second with 31,661 people and Lawrence ranking fourth with 24,559 people.

Source: U.S. Census Bureau, American Community Survey, 2012 Data Release, December 2013.

The 2012 American Community Survey 5-year data is a 5-year average of data collected from 2008 through 2012.

Ethnicity

Though Bedford County ranks third with population ages 18 – 64, the County leads the service area with the highest population of Hispanic families. With the second highest percentage of population who lack literacy skills. Maury County ranks second with 5.2% of families being of Hispanic descent. Looking at HS/EHS 2014-15 enrollment, 58% of the children enrolled in Bedford County reported Hispanic ethnicity. Marshall County data reflects 80% of the families are Hispanic. This reflects an ongoing growth of Hispanic families in Marshall County, though it should be noted the program has one site with an enrollment of 36 to for the year to date. Thus the 80% reflects an enrollment of roughly 16 families. Maury County follows with 28% of enrollment reporting Hispanic ethnicity.

Language

When looking at the primary language of the population in the communities served, Bedford County has the largest number of families who speak another language at home. After English, Spanish is the predominant language in the area. There are small numbers of families who speak Samali, Gujarati and Mandarin Chinese in the area. The

HS/EHS program has all forms translated into Spanish and the Family Handbook translated in Mandarin as well. All written correspondence is translated into Spanish for families of whom Spanish

	Hispanic Population %	Language Other than English spoken at Home %	HS/EHS Enrollment %	Total Population Lacking Literacy Skills %

<http://quickfacts.census.gov; Childplus.net>

is their primary language. Additionally, interpreters are available for Parent meetings, Policy Council and communication with the community. Bedford and Maury counties have multiple classroom staff who speak Spanish to meet the needs of the children. Marshall County continues to be a challenge in regards to hiring bilingual staff for the classroom, so the program has a DLL Coach that is onsite on a regular basis, with phone access at other times, to assist with any language barriers.

Literacy Skills

The service area as a whole has higher literacy scores than the nation, yet the majority is at or lower than the Tennessee state average. While 13% of Tennesseans lack literacy skills, 20% fall into this category in Lincoln County and 19% in Bedford County.

Household Poverty Status

Though Perry County's population is second lowest, they rank highest (18%) in percentage of families living in poverty. Lewis County follows with the third lowest population, yet highest percentage (18%) of families living in poverty.

When looking at households in poverty by County, 58.5% of the households in poverty in Maury County have a female head of household. 48% of the households in poverty are led by a female in Coffee County. These are of note because they have the largest population of households in poverty. Seven of the thirteen counties in the service area are at or above the Tennessee average for households in poverty. All but one is higher than the national average (11%). Moore County identifies 6% of families in poverty.

This county is the smallest county served with a large corporate presence of Jack Daniels.

S1701: Poverty Status in the last twelve months 1/2015

As a state, Tennessee has a higher percentage of inhabitants age 65 years and older than the nation. Wayne County reports the

largest percentage (20 %) of birth to four year olds living in poverty, as well as persons 65 and over (16.7%). When looking at the age group between 18 and 64 years, Perry County leads with 22.5% and 21.2% of Lewis County are living in poverty. Ten of the thirteen counties in the service area report a higher percentage of 65 and older residents than the 9.4% national average.

Poverty Rate Change for Children under Five, 2000 – 2012

Though Moore County reports 6% of families living in poverty in 2011, statistics show that Moore County's poverty rate increased by 17.2% from the 2000 to 2012. Because the county is small geographically and in population, the large growth is less significant than the 7.5% change in Maury County. This change in number represents an increase of almost 600 children under the age of five living in poverty.

Geographic Area	Children 0-4 in Poverty, 2000	Poverty Rate, 2000	Children 0-4 in Poverty, 2012	Poverty Rate, 2012	Change in Poverty Rate, 2000 - 2012

Grandparents in Households

With the exception of Marshall County which had a higher number of 12-17 year olds living with grandparents and Moore County, where both the 6 – 11 and 12-17 age groups were larger than the birth to 6 age group, the numbers in eleven of the counties were highest in the under 6 age group. In Marshall County, the 12 – 17 age group was 52.7% which is significantly higher than the other two age groups. Marshall County is the only county within the service area to have this significant difference. When looking at

Composite State Ranking, Tennessee #41

Child Homelessness Trends		Population		
State		2010-2011	2011-2012	2012-2013
Tennessee	Homeless Children	27,986	29,365	28,798
Child Homelessness Trends		Food Security		
		HH very low food security	HH Eligible for SNAP	
Tennessee	Child Food Security	21%	16%	
Child Homelessness Trends		Homelessness Risk		
		Percentage	#	Ranking
Tennessee	Home Foreclosure Rank			22
Tennessee	Children in Poverty	26%		
Tennessee	Children without Insurance	5.70%		
Tennessee	Female-Head of HH	7.50%		
Tennessee	Birth Rate per 1000/teens		38.5	
Tennessee	State Minimum Wage		\$7.25/hr	
Tennessee	Income for 2-BR Apartment		\$13.84/hr	
Tennessee	HH paying 50% + in Rent	20%		

The SCHRA service area is largely rural. Rural Homelessness is difficult to address because of fewer shelters, little community awareness and less government aid.

Federal Assistance Benefits

2008-2012 American Community Survey 5-Year Estimates
 SSI – Supplemental Security Income
 SNAP – Supplemental Nutrition Assistance Program

Subject	With Supplemental Security Income	With Cash Public Assistance Income	With Food Stamp/SNAP Benefits in the Past 12 Months
United States	4.6%	2.7%	11.4%
Tennessee	5.0%	2.9%	16.0%
SCHRA Service Area	5.55%	3.69%	18.13%
Bedford	5.2%	2.9%	19.1%
Coffee	5.5%	3.4%	18.2%
Franklin	6.0%	3.2%	14.7%
Giles	6.2%	4.7%	16.5%
Hickman	5.2%	4.1%	20.0%
Lawrence	5.0%	3.6%	16.3%
Lewis	4.6%	7.1%	28.2%
Lincoln	5.5%	3.0%	17.5%
Marshall	6.4%	4.2%	18.5%
Maury	5.5%	2.5%	16.8%
Moore	5.0%	1.1%	10.3%
Perry	6.4%	2.4%	18.9%
Wayne	5.7%	5.8%	20.7%

As a whole, the service area residents exceed the National and State averages of number of recipients of SSI, Cash Public Assistance and SNAP. Lewis County has, by a large margin, the largest percentage of families receiving SNAP (28%) and Cash Public Assistance (7.1%).

Medical Insurance

Lawrence County reports an extremely high number of uninsured children. A large Amish settlement is located in Ethridge Tennessee with an estimated population of over 2100 members. Hurst and McConnell state that immunization can be especially low among conservative groups, with only 6% of Swartentruber Amish participating, compared to 63% of the overall Amish population and 85% of the non-Amish population, according to a 1984 study (*Paradox*, Hurst/McConnell). The Swartentruber Amish live in thirteen states today, as well as Ontario. The highest population is located in the Holmes/Wayne county community in Ohio, where 19 Swartentruber districts may be found. Other significant Swartentruber populations are found at Lodi/Homerville in Ashland and Medina Counties in Ohio, as well as at Ethridge, Tennessee (both communities founded over 40 years ago, and numbering over 10 or more church districts).

Tennessee Housing Development Agency; Tennessee Housing Needs Assessment; September, 2012

Severe housing problems encompass Availability, Quality and Affordability. As the working populations decline in rural areas, homes become vacant and simple repairs are not completed. As housing values decline with delayed repairs, obtaining mortgages and home rehabilitation loans become more difficult to obtain.

2008-2012 American Community Survey 5-Year Estimates

Twelve of the counties in the service area average a lower high school graduate rate than the Tennessee average (83.9%). At 84.8%, Maury County is the only area that has a higher rate of graduation, but it does not surpass the national average (85.7%). Wayne, Perry and Hickman report the lowest graduation rates in the community. These counties are the most rural of all the counties served in the area. Upon review of Head Start enrollment demographics, it is found that six of the counties served show families have a lower high school graduation rate. Possible contributing factors may be the small number of enrollment in the smaller counties such as Perry with an enrollment of eighteen (18) children. Giles County is home to Martin Methodist College and Arnold Air Force Base is located in Coffee County. The Head Start needs to further research enrollment opportunities to ensure the neediest of families are served. One possible remedy may be to alter the selection criteria to include additional points for parents without a high school degree.

Local Education Agencies

Though the service area encompasses 13 counties, the Head Start/Early Head Start program partners with a total of sixteen (16) school districts (3 City Systems). The program coordinates the annual calendar to coincide with the local school system as much as possible. This includes scheduling fall and spring breaks at the same time. PreK collaborations exist in Franklin, Maury and Wayne Counties. These collaborations consist of a mesh of Head Start and PreK resources. Collaboration classrooms are staffed with three adults (1 Teacher; 1 PreK Assistant; 1 HS Assistant) Head Start provides a Family Partner to reach out to families in need of referrals and to facilitate Family Engagement in their child's education.

Tennessee Comprehensive Assessment Program (TCAP) Achievement Test

The Tennessee Comprehensive Assessment Program is the state's primary standardized test. Students in grades 3-8 and high school take the TCAP across all academic subjects.

Education Report Card – TCAP Scores Grades 3rd-8th

The chart below is organized by the largest growth from 2012-13 to 2013-14. Though some of the largest increases are in the area of Math and Science, it is notable that many of the districts remain below basic expectations in these areas. Additionally, trends appear in the area of low to negative growth in math and science.

As represented in the tables above, Science and Math continue to be areas children show limited comprehension and growth. As is evidenced in the TCAP info, 2014-15 HS/EHS preliminary data shows a parallel with the same low growth in knowledge of the areas of science and math. The 2013-14 program year showed significant growth in math outcomes for Head Start. This was attributed to a large investment in classroom supplies and supervision focus on the area of math. A possible reason, the growth wasn't sustained may be the 2014-15 shift to focusing classrooms observations on CLASS (Class Assessment Scoring System). Though the system has a valid basis in the observation of classroom relationships between the teachers and children, the transition to a system is quite intricate and the program's management continues to search for full successful integration.

Disabilities

During the HS/EHS 2013-14 program year, 58% of the children identified as a result of HS/EHS screening or referral. Thus for in the 2014-15 program year 46% of the disabilities have been identified during the year. Unfortunately, of that 36% identified, 38% have not received services yet. Upon review of program monitoring data, the time between referral and services may range from one month to six varying between local education agencies. In an effort to increase the communication and tracking of services, the program will add a full time position devoted solely to disabilities services. These duties will include assisting classroom teachers with identification, individualization and modifications, as well as increasing communication with LEA systems to facilitate timely screening, identification and service provision.

Disabilities 2014-15

Tennessee Adolescent Pregnancy Summary Data 2013, published February 2015
 Adolescent pregnancies are the sum of live births, reported fetal deaths, and induced termination of pregnancies.
 A dash (-) indicates there were no pregnancies. State totals may include pregnancies with county of residence unknown.
 Source: Tennessee Department of Health, Division of Policy, Planning and Assessment

Data from the Tennessee Department of Health shows that the largest number of adolescent births occurs in Maury and Bedford Counties. Relevant to this analysis is that Bedford County's population is roughly half that of Maury County. Yet, adolescent pregnancy numbers are almost the same.

Obesity

Tennessee has the fourth highest obesity rate in the nation according to The State of Obesity: Better Policies for a Healthier America (2013). Following Mississippi, West Virginia and Arkansas, 14.2% of low income children age's two to four in Tennessee are categorized as obese. 20.5% of Tennessee's adolescents ages ten to seventeen fall into the obese category. Adults lead the obesity numbers with 33.7% being labeled as obese. Tennessee was one of six states in the nation to report a rise in obesity for 2013.

Comparing county data alerts that Bedford (36%) and Giles (36%) have the highest obesity rate in the service area. Coffee (35%) and Maury (35%) follow close behind with Hickman (34%) being the fifth county to be above the Tennessee State average (32%).

County	Adult Obesity Rate	Poor or Fair Health Rate

Community Health

The Population Health Institute at the University of Wisconsin, with assistance from the Robert Wood Johnson Foundation, gathered data for County Health Rankings in 2013. They put together two categories, Health Outcomes and Health Factors. Health Outcomes represent how healthy a county is while health factors represent what influences the health of the county.

There are 95 counties in Tennessee. In the table below, Health Outcome rankings for the 13 county service area are depicted on the top row.

Hickman (rank 69) and Lincoln (rank 62) are the lowest ranked in the area. Lincoln ranks number 89 of 95 in the Quality of Life category. Lincoln has the highest incidents in our services area, with 10.3% of babies born with low birth weight. Hickman ranks 74th of 95 Tennessee counties in the Quality of Life category. With the exception of Giles County, all counties in the service area have higher than the Tennessee average in the area of poor or fair health.

Health Factors	
Health Behaviors (30%)	Tobacco Use Diet & Exercise Alcohol Use Sexual Activity
Clinical Care (20%)	Access to Care Quality of Care
Social & Economic Factors (40%)	Education Employment Income Family & Social Support Community Safety
Physical Environment (10%)	Environmental Quality Built Environment

Unfortunately, the whole service area also scores higher than the Tennessee average in the area of adult smoking, while tying or scoring higher in the area of physical inactivity. While the majority of Tennesseans (60%) have access to exercise opportunities, only 7% of the population in Perry County has access, followed with 8% in Hickman County.

Food Environment Index Factors

- Food Choices--Indicators of the community's access to and acquisition of healthy, affordable food, such as: access and proximity to a grocery store; number of food stores and restaurants; expenditures on fast foods; food and nutrition assistance program participation; food prices; food taxes; and availability of local foods.
- Health and Well-Being--Indicators of the community's success in maintaining healthy diet

Households Receiving SNAP by Poverty Status, 2012

Source: [U.S. Census Bureau, American Community Survey, 2012 Data Release, December 2013](#). The 2012 American Community Survey 5-year data is a 5-year average of data collected from 2008 through 2012. SNAP numbers are for the last 12 months of the five-year average (2012).

Food stamp benefits are issued and accessed electronically using a Benefit Security Card or EBT Card. Additionally, SCHRA contracts with the Tennessee Department of Agriculture to distribute donated food items to households residing within the agency's 13 county service areas through the Emergency Food Assistance Program.

Eligible households are defined as those households meeting one of the following requirements:

1. Fall at or below 150% of the federal poverty guidelines, or,
2. Proof of assistance programs such as Food Stamps, AFDC, SSI, Families First, Public Housing, or Low Income Heating Energy Assistance Program (LIHEAP).

Community Grocery Stores

Each Head Start / Early Head Start center has access to grocery stores in their area. Due to the rural locations of some communities, at times there may be limited options regarding the choice of a local grocery store. Of note is that some stores listed are primarily convenience stores which may have no or a limited selection of fruit and

vegetables and may have higher prices. When possible, the contracted food vendor is used to provide produce that is not available locally or economical. Following is a listing of grocery stores in the service area counties:

***Color* Indicates the grocery store that is contracted within each county for fresh fruits, vegetables and breads.**

Food Security

Food security means access by all people at all times to enough food for an active, healthy life.

Prevalence of household-level food insecurity and very low food security, average 2011-13

State	Number of households		Food insecurity (low or very low food security)		Very low food security	
	Average 2011-2013 ¹	Interviewed	Prevalence	Margin of error ²	Prevalence	Margin of error ²
	<i>Number</i>	<i>Number</i>	<i>Percent</i>	<i>Percentage points</i>	<i>Percent</i>	<i>Percentage points</i>
U.S.	121,203,000	129,433	14.6	0.23	5.7	0.14
AL	1,865,000	1,472	16.7	2.87	7.0	1.39
AR	1,172,000	1,527	21.2 *	3.02	8.4 *	1.58
FL	7,892,000	4,895	14.1	1.08	5.9	0.71
GA	3,888,000	2,694	16.6 *	1.68	6.0	0.93
KY	1,812,000	2,064	16.4	2.17	6.7	1.21
LA	1,807,000	1,372	16.5	2.57	5.5	1.71
MS	1,126,000	1,291	21.1 *	2.80	7.2	1.73
SC	1,895,000	1,878	14.1	1.61	5.3	0.73
TN	2,594,000	1,864	17.4 *	1.75	7.0 *	1.19

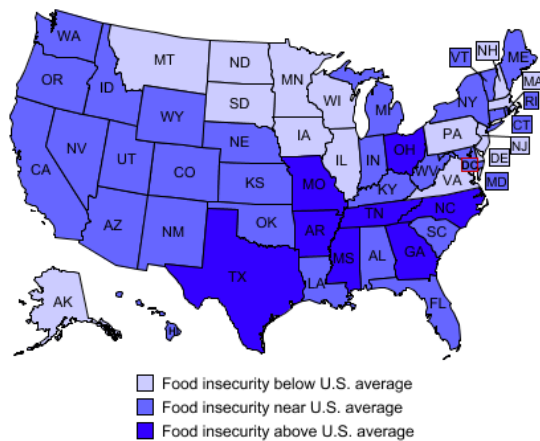

*Difference from U.S. average was statistically significant with 90 percent confidence ($t > 1.645$).

¹Total exclude households for which food security status is unknown because they did not give a valid response to any of the questions in the food security scale. These represented about 0.3 percent of all households in each year.

²Margin of error with 90 percent confidence (1.645 times the standard error of the estimated prevalence rate).

Mental Health

Mental Health services are provided by qualified professionals in all of our local communities. There are also a number of agencies that provide services for children and youth with and without disabilities. Centerstone (www.centerstone.org) is the local mental health provider for all of our service area. Qualified staff members provide outpatient services that are linguistically and culturally appropriate to the extent possible. They also accept TennCare as a payment source. There is a Centerstone Center located in each of the thirteen counties served by SCHRA Head Start with the exception of Wayne County. Residents of Wayne County can access the Centerstone clinics in surrounding counties or utilize an alternate provider. Transportation to scheduled mental health appointments can also be paid by TennCare. It should be noted that Centerstone does not always have staff that are certified to work with children birth to six and services for this age group are extremely limited in all of our service area. Local School Systems are utilized to conduct psychological and behavior assessments for preschool children. The Child Development Center at Vanderbilt University

Medical Center also provides screening and assessments for children under the age of eight. Health Connect America (www.healthconnectamerica.com) is another local mental health service provider in the area that offers services for serious issues including grief, abandonment, anger management, substance abuse and family conflict. Health Connect serves at-risk youth and their families to support the preservation of families and to improve the lives of children-at-risk and their families. Health Connect uses therapeutic models that include, but are not limited to: Cognitive-Behavioral Therapy (CBT); Rational-Emotive Therapy (RET); and needs-based Client/Family Centered Counseling. Additional interventions will include: written assignments, skill demonstrations, and behavioral modeling.

There are a number of other mental health resources and referral agencies that provide services to young children and their families. These include:

- Department of Mental Health and Substance Abuse Services (www.tn.gov/mental)
- Kid Central Tennessee (www.kidcentraltn.com)
- Alliance for the Mentally Ill of Tennessee (www.namitn.org)
- Tennessee Department of Mental Health (www.tn.gov)
- Tennessee Voices for Children (www.tnvoices.org)
- TennCare Partners Advocacy and Information Line (www.tenncareadvocacy.com)
- Depression and Bipolar Support Alliance (www.dbsalliance.org)
- Youth Villages (www.youthvillages.org)

The travel time to access services varies within our thirteen county areas. In an effort to address the ongoing mental health needs of our families, a Mental Health Coordinator is on staff full time. They are responsible for facilitating consultations as well as monitoring services. The Mental Health Coordinator works in conjunction with a Psychologist who works with the program on a contractual basis.

South Central Human Resource Agency provides mental health and substance abuse coverage through Magellan (800-308-4934) (www.magellanassist.com) for employees who select this specific service. Mental Health services are also available to staff under the agency's Employee Assistance Plan.

Mental Health referrals initiated by HS/EHS staff have increased consistently in recent years. The program uses the DECA to conduct mental health assessments and of the 973 assessments completed over 20% needed some sort of follow up regarding a parent or teacher concern.

 As of 2013, no statewide planning efforts had taken place in Tennessee.

Licensed Child Care & Pre School Capacity

The HS/EHS 2012 Community Assessment revealed a 36.9% increase of available center based slots with while there was a reduction in family and group home services. Current Department of Human Services information (March 2015) about licensed child care and preschool programs in the service area reveals an overall reduction in available slots in all categories. There was a significant reduction in available center based services in Bedford (58%), Coffee (53%) and Franklin (53%). Data shows a consistent trend of reduction across all forms of licensed care including family homes, group homes and center based services since 2012.

Community Impact:

Head Start/Early Head Start Program

The SCHRA Head Start/Early Head Start Program is located in Southern Middle Tennessee and serves children and families in thirteen counties. Socialization skills, problem solving, self-esteem building, and academic preparation are taught. Children benefit from free health care, dental care, social services, speech/language services, and disability services. Families have access to community resources, job training, and direct support from SCHRA Head Start Family Partners and teaching staff. SCHRA Head Start is the sixth largest Head Start program of the twenty-one programs that operate in Tennessee. The funded enrollment for the HS program is 945 (EHS 44). Currently there are 366 children on the program's waiting list, 260 for Head Start and 106 for Early Head Start. Comparing community trends in population and poverty with childcare slots available led SCHRA to apply for expansion funds for the Early Head Start program. Funds were awarded (128 additional slots) March 2015 to expand services in Bedford, Coffee, Giles, Lincoln and Maury counties.

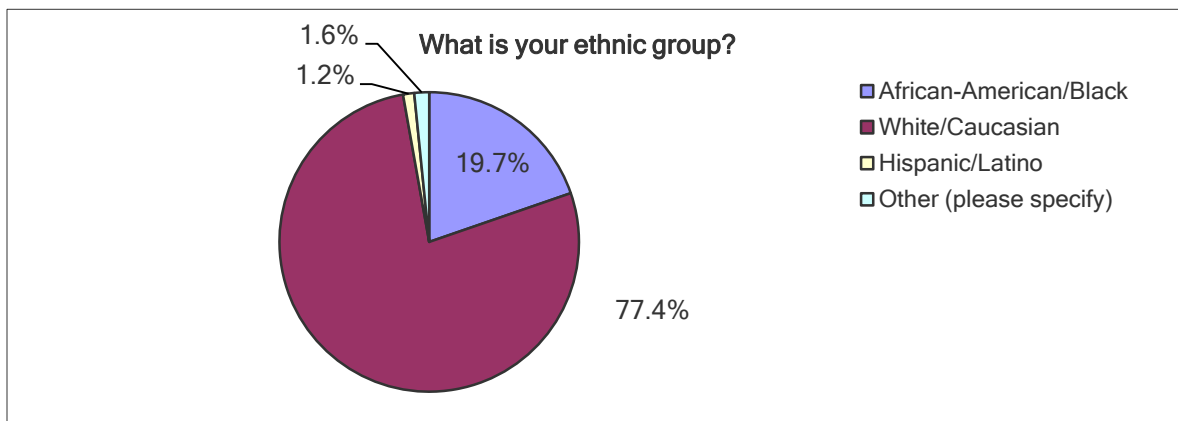

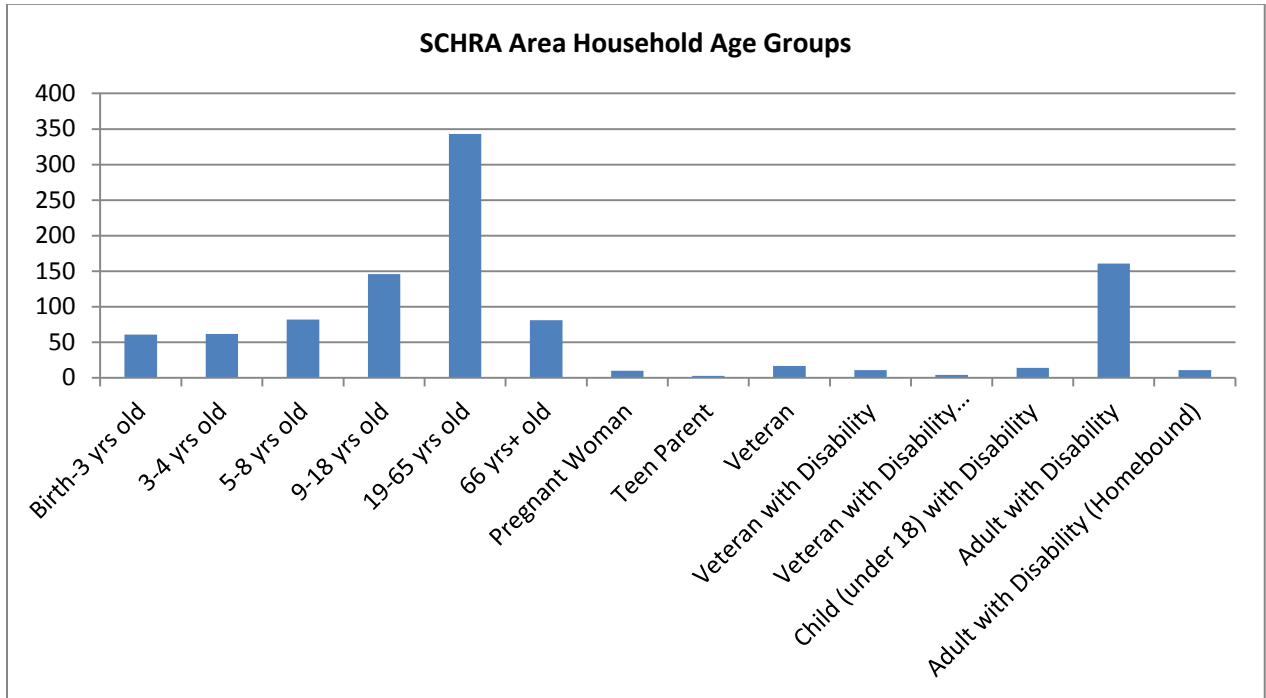

**South Central Human Resource Agency
Community Programs**

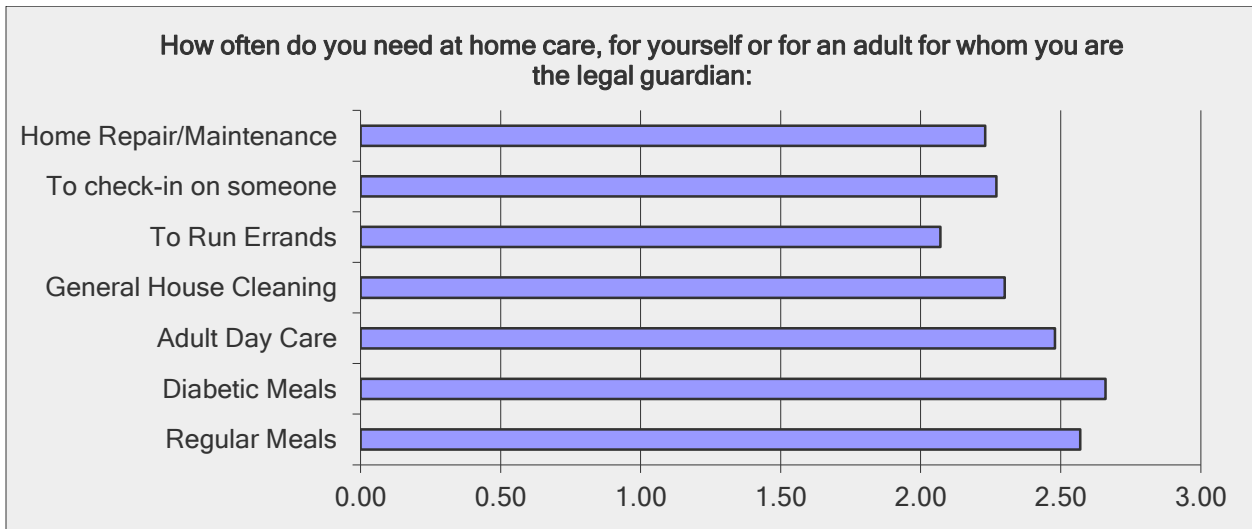

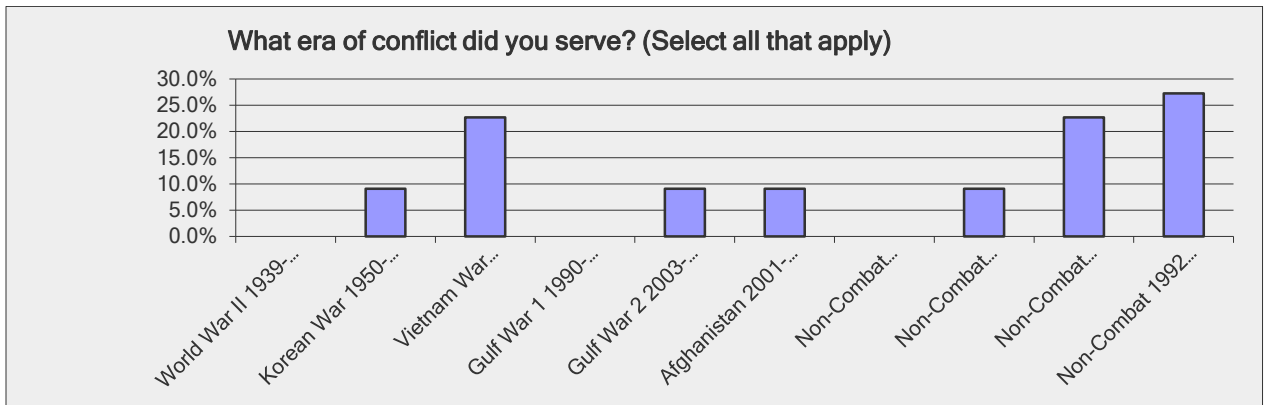

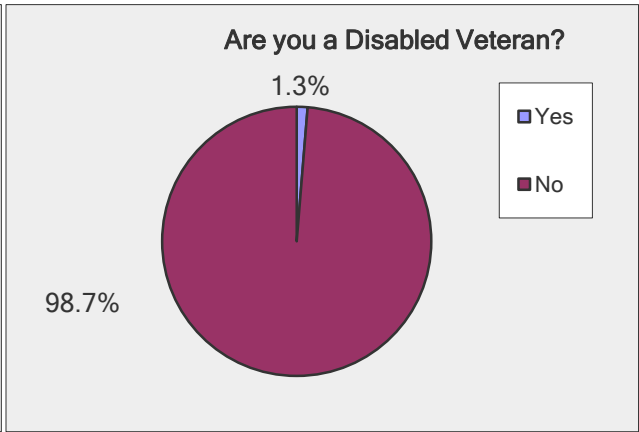

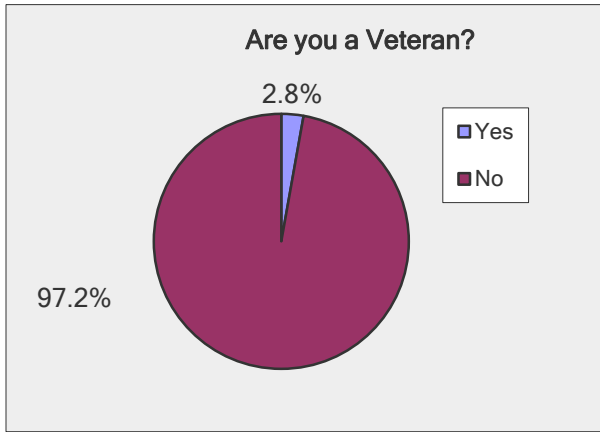

Program	Goal
Home & Community Based Program (OPTIONS) Medicaid Waiver/Homemaker/Home Modification /Family Caregiver, Meals	Provides homemaker, personal care, sitter service, and home delivered meals to elderly and adults 18 years or older with a disability.
Foster Grandparents- FGP	Provides stipend volunteer opportunities for limited income persons age 55 and over to give support services to children with "special needs" in the community.
Senior Community Service Employment Program - Title V	Assists economically disadvantaged people age 55 and older by providing immediate supplemental income, work experience, training and assistance with placement in permanent employment situations.
Low Income Home Energy Assistance Program LIHEAP	Provides financial assistance for heating costs to elderly, handicapped and low income persons.
Community Services Block Grant CSBG	Provides access to programs and services needed by elderly, handicapped and low-income persons through Neighborhood Service Centers.
Social Services Block Grant/Protective Service Homemaker	Provides support services to adults who have been threatened with abuse, neglect, or exploitation.
Emergency Food Assistance Program	Provides USDA donated food products to low income households at distributions held quarterly in each of our thirteen counties.
Community Corrections Program	Provides alternative to incarceration for non-violent felony offenders.
Alcohol / Drug Safety Education	A court ordered education program providing a minimum of 12 hours of education pertaining to substance abuse, physiological and psychological aspects of alcohol and drug use.
Head Start / Early Head Start	Provides comprehensive early intervention services for income eligible families, children with special needs. Programs are designed to help in four important areas: <i>education, health, family engagement, and social services.</i>
Food Service Program Nutrition Services for the Elderly Ensure	Provides a hot nutritious noon-time meal to individuals for a fee without limited qualifications. Catering is also available for lunches, dinners, parties, etc. Provides a hot nutritious noon-time meal at congregate meal sites for individuals 60 years of age and older, and delivers meals to eligible homebound. For sale to the public, with no qualifications, at a discounted price.
Community Representative Payee Program Private Pay Homemaker Services	Provides money management services to assist persons who are incapable of keeping track of financial matters. Must receive Social Security or disability benefit and certified by a physician to be incapable of money management. Provides light housekeeping and respite sitter services, on a fee basis, with no limiting qualifications.
Ensure	For sale to the public, with no qualifications, at a discounted price.
Catering	The Nutrition program offers full service catering to the public for a fee, depending on what you order. The funds from the catering help generate enough income to purchase equipment as as needed and to help sustain the Nutrition program at five days per week.
Private Pay Homemaker Services	Provides light housekeeping and respite sitter services on a fee basis, with no limiting qualifications
Volunteer Income Tax Program (VITA)	Volunteers complete annual tax returns for low and moderate income taxpayers free of charge.

SCHRA 2015 COMMUNITY NEEDS ASSESSMENT SURVEY RESPONSES

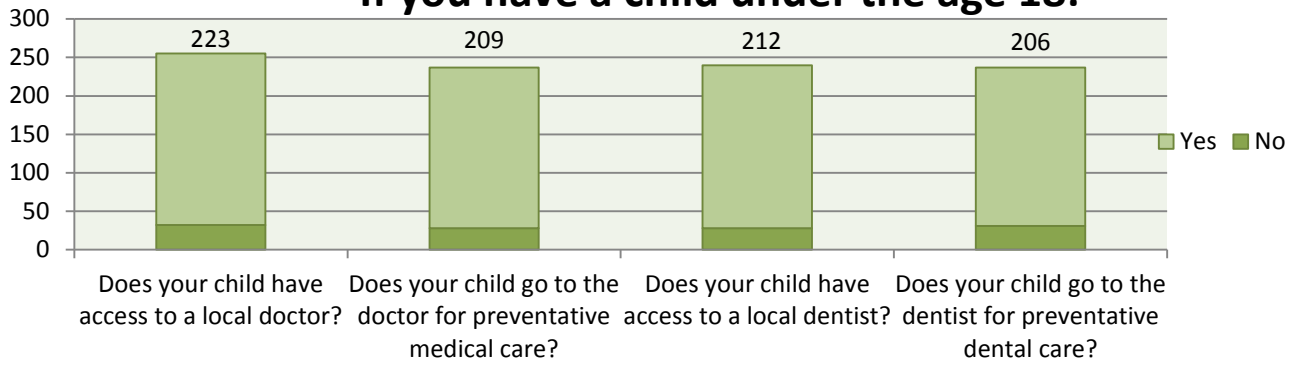

If you have a child under the age 18:

Do you depend on friends/family for Transportation regularly?

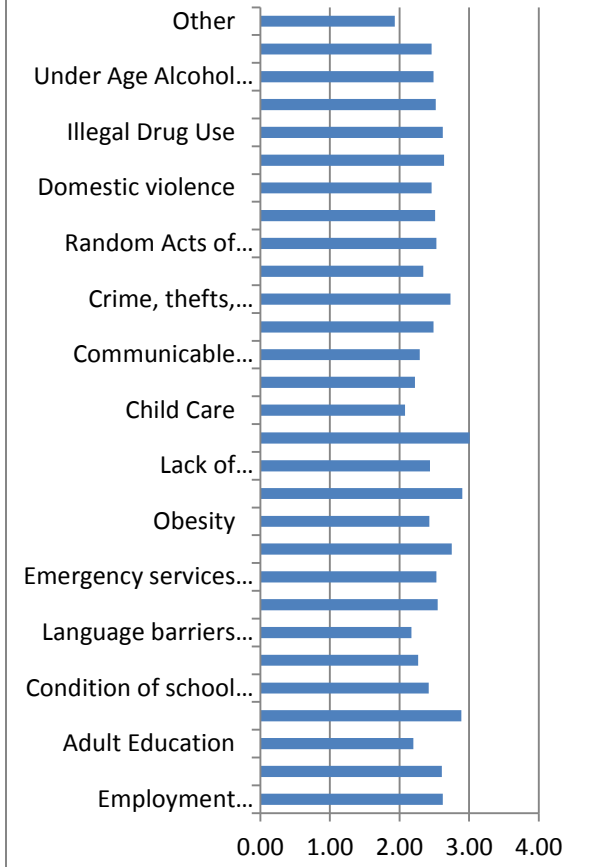

Do you currently use Public/Community Transportation?

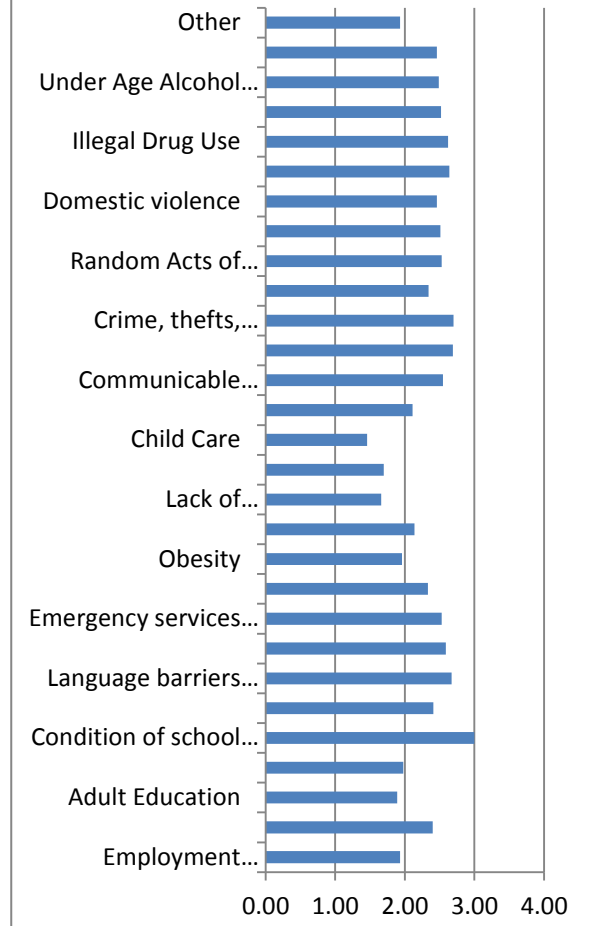

Are you in need of Public Transportation?

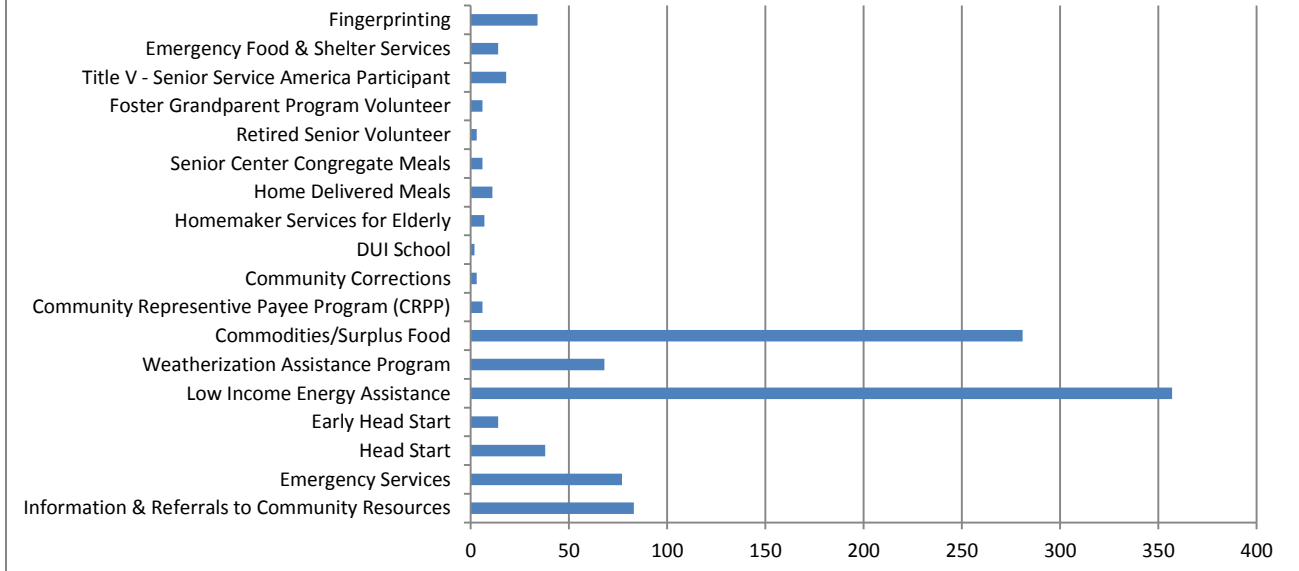

Concerns about Community

Concerns about Family

Services Received from SCHRA

Community Assessment: Identified Issues and Concerns Going Forward

Disabilities

While almost 50% of the HS/EHS program's children with disability concerns have been identified during enrollment in the HS/EHS program, it is imperative to increase successful early intervention rates. This assessment identified that 38% of the identified children had not received services at the time of printing. Delayed intervention can result in adverse and persistent consequences for academic skill acquisition. In contrast, early identification of children at risk for learning disabilities may offer the potential to mitigate the negative effects of delayed intervention by directing children to preventive services at an earlier age. During childhood, individuals with learning disabilities face a complicated and challenging task of integrating their disability into an emerging self-concept. With developmentally appropriate assessment and intervention, potential for families to gain coping mechanisms and systems is great. Current program setup includes an Education/Disabilities Coordinator who maintains annual agreements with Local Education Agencies and tracks referrals and services.

Obesity

Tennessee has been identified as having the fourth highest prevalence of childhood obesity in the nation. Following Mississippi, West Virginia and Arkansas, 14.2% of low income children age's two to four in Tennessee are categorized as obese. 20.5% of Tennessee's adolescents ages ten to seventeen fall into the obese category. Adults lead the obesity numbers with 33.7% being labeled as obese. Tennessee was one of six states in the nation to report a rise in obesity for 2013. It is imperative that the program continue to search for ways to foster a healthier community. While the HS/EHS program started the I am Moving, I am Learning Initiative in 2009, the momentum has diminished with time and staff turnover.

Math & Science

2014-15 HS/EHS preliminary data shows low growth in knowledge of the areas of science and math. The 2013-14 program year showed a larger growth in math outcomes for HS/EHS. This was attributed to a large investment in classroom supplies and supervision focus on the area of math/science. A possible reason, the growth wasn't sustained may be the 2014-15 shift to focusing classrooms observations on CLASS (Class Assessment Scoring System). Though the system has a valid basis in the observation of classroom relationships between the teachers and children, the transition to a new system is quite intricate and the program's management continues to search for full successful integration.

Mental Health

Progressively over the last three years mental health assessments have consistently reflected a high percentage of parent and/or teacher concerns. As noted on page 30, nine of the eleven counties with data in the service area reported higher instances of poor mental health than the Tennessee average. 2014-15 HS/EHS mental health screening data shows that of the 985 completed assessments, 487 indicated the need for follow up of some nature.
